

Indian IS – 500

The SF100 is a compact and reliable biometric access control device designed to provide secure and efficient authentication. It supports fingerprint-based access along with optional card verification, making it suitable for industrial and commercial applications. With multiple communication interfaces and built-in access control features, the SF100 ensures controlled access, enhanced security, and seamless integration with existing systems.

Technical Specifications – SF100 Biometric Device

Parameter	Specification
Model	SF100
Display	2.4-inch TFT Color Screen (320 × 240)
Fingerprint Sensor	Optical Sensor (500 DPI)
Algorithm Version	V10.0
Communication	TCP/IP, RS485*, USB Host
Fingerprint Capacity	1,000
Card Capacity (Optional)	5,000 (EM / IC Card)
Transaction Records Capacity	80,000
Access Control Interface	Electric Lock, Door Sensor, Alarm, Exit Button, Doorbell
Power Supply	DC 12V / 3A
Operating Temperature	0°C ~ 45°C (32°F ~ 113°F)
Operating Humidity	20% ~ 80%
Dimensions (W × L × H)	90 × 90 × 34.5 mm
