OUR VISION

We aim to set new industry benchmarks, delivering bespoke, scalable solutions that resonate with the evolving needs of a global clientele, driving progress through customer-centric innovation.

OUR MISSION

We are committed to crafting intuitive solutions that empower businesses to enhance operational efficiencies, fortify their security infrastructures, and embrace digital transformation with resilience and agility.

CORE HR MODULES

Empowering Your Workforce, **Simplifying HR Management**

► HRMS

- ✓ **Time and Attendance:** Automate attendance tracking with support for multiple shifts, geo-tagging, and AI-based face recognition
- ✓ **Leave Management:** Handle various leave types with user-defined policies, ensuring accurate tracking and reporting
- ✓ **Employee Self-Service (ESS):** Empower employees to manage personal information, view payslips, and apply for leaves through a user-friendly portal
- ✓ **Performance Management System:** Facilitate performance appraisals and goal setting to drive employee development and organizational growth
- ✓ **Recruitment and Onboarding:** Streamline the hiring process from resume collection to candidate onboarding, enhancing efficiency

► PAYROLL

- ✓ **Comprehensive Employee Information System:** Maintains comprehensive employee records with document attachment features for easy access
- ✓ **Customizable Pay Structures:** Enables customizable pay structures to align with organizational policies
- ✓ **Statutory Compliance:** Automatically generates statutory documents like PF, ESIC, TDS, and more for compliance
- ✓ **Loan Management:** Manages employee loans with integrated tax computation
- ✓ **Budgeting:** Facilitates manpower budgeting with cost-center-based variance reporting
- ✓ **Maker & Checker System:** Implements a Maker & Checker system for dual control and payroll accuracy
- ✓ **Extensive Reporting:** Offers over 400 pre-designed reports with customizable templates for detailed insights

► FACIAL RECOGNITION SYSTEMS

- ✓ Effective up to a distance of 3 meters, enhancing throughput in high-traffic areas
- ✓ Equipped with technology to detect and prevent false entries using high-quality dual cameras
- ✓ Supports multiple network protocols including Wi-Fi, 3G, and 4G for uninterrupted connectivity
- ✓ Can store up to 10,000 facial templates, adaptable for large organizations
- ✓ Offers multiple verification methods such as facial recognition, fingerprint scanning, and RFID, tailored to various security needs
- ✓ Real-time data transfer ensures instant updates and secure information sharing
- ✓ The device captures and verifies faces in less than one second, facilitating quick access

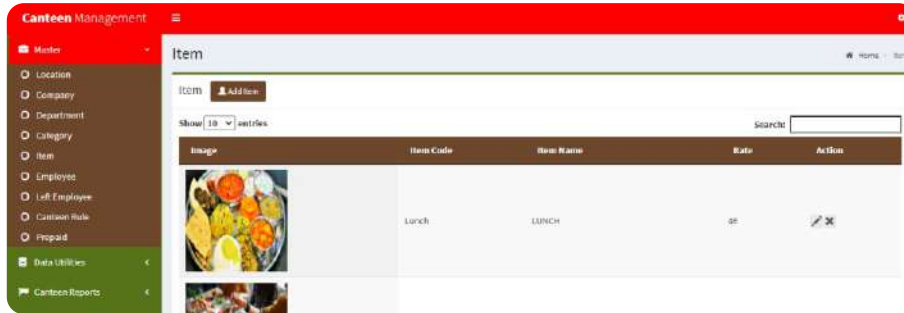

► EASY TIME ATTENDANCE SYSTEM

- ✓ Client-server architecture with backend support of MS SQL
- ✓ Multi companies, locations, departments, Sub-Departments, units, and shift support
- ✓ Module-wise & User-Wise rights control
- ✓ Rule Module facility for configuring various policy setups
- ✓ Complete leave management with user define policy
- ✓ Inbuilt night shift handling, Day Shift and Auto Shift logics
- ✓ Location, Company, Department, Category, Grade, Designation, Shift-wise report generation
- ✓ 60+ functional MIS reports
- ✓ Report Writer tool
- ✓ Auto Data Process and Reprocess
- ✓ Third Party Integration with Any ERP, Payroll, SAP

EASY CANTEEN MANAGEMENT SYSTEM

The Biometric canteen and cafeteria management system software enables cashless transactions and well-structured operational management. It bridges the gap between the canteen and its usage in an intuitive and effective manner. The Canteen Management Software is the latest, most functional cashless canteen management system. It ensures trouble-free transactions to manage cafeteria usage accurately with an added advantage of going paperless.

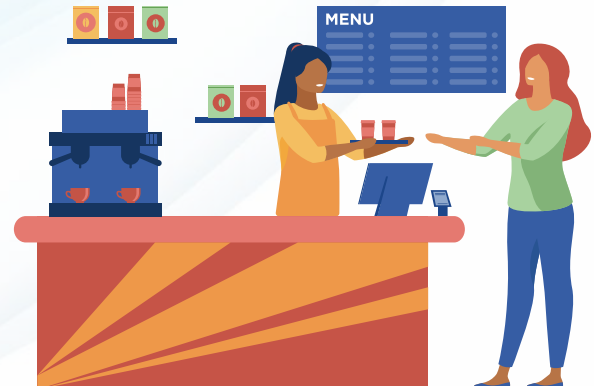

This software offers Canteen Management in Prepaid/Postpaid modes. You can check or validate daily or monthly food transactions in real-time supported by multi-company, multi-user & multi-vendor options. The Biometric Canteen Management System Software comes with a capability of seamless third-party integration for Payroll/ERP systems with quick and easy excel reporting.

► KEY FEATURES

A Paperless canteen management system for cashless and automated food serving process at the cafeteria. It provides for accurate, fast and efficient service.

- ✓ Multi company, Multi Location Canteen Support
- ✓ Prepaid and Postpaid Transactions
- ✓ Canteen rule module for calculations
- ✓ Subsidy calculations
- ✓ Planned schedule for the breakfast, Lunch, Dinner
- ✓ Employee identification through biometric devices
- ✓ Vendor/Canteen wise bill generation
- ✓ POS terminal with printer
- ✓ Prompt and up-to-date Statistics
- ✓ Report writer tool for user defined reports
- ✓ Integration with payroll software or any ERP for deductions at month-end

EASY VISIT- VISITOR MANAGEMENT SYSTEM

The Visitor Management System (VMS) is a cutting-edge, cloud-based solution designed to streamline visitor operations for businesses of all sizes. Whether you are managing guests, clients, or vendors, the system ensures seamless registration, secure check-ins, and efficient communication between visitors and employees.

► WHY CHOOSE OUR VMS?

- ✓ **Cloud-Based SaaS:** Scalable for small offices and enterprises
- ✓ **Customizable:** Tailor forms, workflows, and features to suit your needs
- ✓ **Efficient Reporting:** Detailed insights and analytics at your fingertips
- ✓ **Data Privacy and Security:** Built to comply with regulatory standards

► KEY FEATURES

- ✓ **Preregistration Made Easy:** Employees can pre-register visitors and send invites via Email, WhatsApp, or SMS
- ✓ **Visitor-Friendly Interface:** Visitors can fill in their details, select timeslots, and request additional services like car pickup or lunch
- ✓ **Real-Time Notifications:** Employees and visitors receive instant updates about approvals, edits, or check-ins
- ✓ **Secure Check-Ins:** QR code scanning, visitor authentication, and gate pass printing for added security
- ✓ **Comprehensive Dashboards:** Monitor visitor activity and analytics with Security, Employee, and Admin Dashboards
- ✓ **Feedback System:** Gather visitor feedback to improve experiences
- ✓ **Biometric Verification:** Enhanced security with blocked user identification

Hexin Mediaa Wave is a powerful, cloud-based media management platform designed to simplify how businesses display and control media content across multiple locations and devices. Our centralized solution allows users to upload, schedule, and manage content remotely, ensuring seamless communication and branding across all screens.

► KEY FEATURES:

- ✓ **Multi-User, Multi-Display Support:** Assign specific displays to users and manage content based on permission and approval levels
- ✓ **Content Scheduling:** Schedule media with start and end times, ensuring timely and relevant displays
- ✓ **Flexible Media Formats:** Supports images, videos, PDFs, URLs, SOPs, and live data streaming
- ✓ **Industries Served:** Ideal for businesses in pharma, manufacturing, education, hospitality, retail, and more
- ✓ **Cloud-Based Access:** Manage media anywhere, anytime with our cloud solution

► HOW IT WORKS?

- 01 Upload Media:** Easily upload media files and assign them to your desired display network
- 02 Schedule Content:** Set up schedules for advertisements, announcements, educational content, or live data
- 03 Monitor and Report:** Track media performance and ensure your message reaches the right audience at the right time

► WHY CHOOSE HEXIN MEDIAA WAVE?

- ✓ **Centralized Management:** Control all your displays from a single, intuitive interface
- ✓ **Customizable Solutions:** Tailored to your specific industry needs, ensuring flexibility and scalability
- ✓ **Easy Integration:** Seamlessly integrates with existing display systems, making the transition smooth and efficient

ENTRANCE CONTROL SYSTEM

► FLAP BARRIERS

- ✓ SUS304 stainless steel casework ensure long-lasting durability
- ✓ Combining cutting-edge technology and sleek design
- ✓ High quality electrical components
- ✓ Barriers retract automatically during emergencies
- ✓ Modern and contemporary design
- ✓ Intuitive LED user guidance
- ✓ Easy integration with third-party access control systems
- ✓ Easy installation

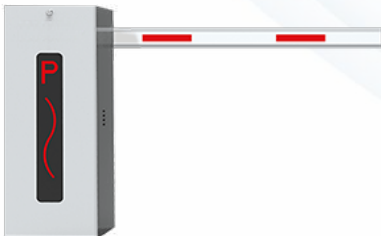

► TRIPOD TURNSTILE GATES

- ✓ Tripod providing effective crowd control
- ✓ Safe and secure entry to a secured area should be easy and comfortable for all users
- ✓ A simple but robust secured entry solution
- ✓ providing safety function such as automatically drop arm if emergency
- ✓ SUS304 stainless steel housing making sure the device have good ability for anti-rust
- ✓ A built-in LED indicator is present in the identity authentication area

► FULL HEIGHT TURNSTILES

- ✓ Aesthetics suit both indoor and outdoor applications
- ✓ With anti-tailgating function, one brake can only pass one person
- ✓ Ability to control the number and direction of people passing through the entrance
- ✓ Robust and long-lasting
- ✓ Low energy consumption
- ✓ Easy installation and field-configurable

► BOOM BARRIER

- ✓ Interactive LED chassis design & Programmable control panel
- ✓ High-efficiency Brushless DC motor
- ✓ The fastest operating speed is 1.5s, and the speed can be adjusted
- ✓ Users could adjust the position and the angle of rising/falling
- ✓ Automatically turning off settings; allowing manual raising of the gate arm
- ✓ The gate arm will move to the original position when it detected something blocked it

► DOOR INTERLOCK SYSTEM

- ✓ Suitable for current GMP norms for clean room
- ✓ Available in touch keyboard, No touch
- ✓ Integrate With Biometric Access Control System
- ✓ Microprocessor Based Control Card, which will control 2 to 16 Door Interlock System
- ✓ Preset able time delay for door magnet release time
- ✓ Easy and quick installation

► ACCESS CONTROL SYSTEM

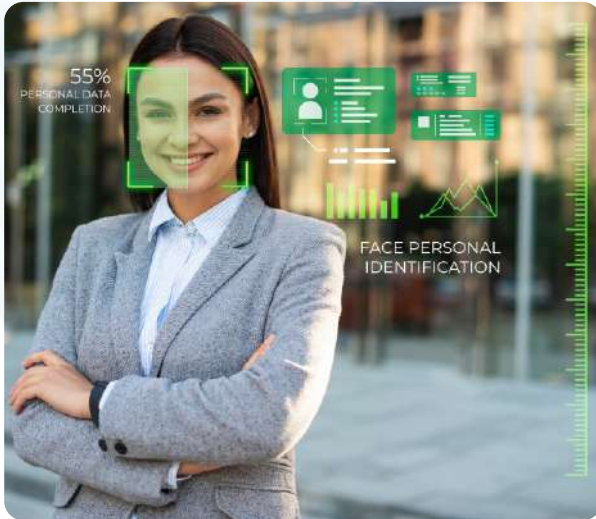

- ✓ Multi door Access Control and Stand alone access control
- ✓ Employee Access Control through RFID, Fingerprint and Face
- ✓ Easily enrol an entire facility or various facilities around the world, with multiple access permissions
- ✓ 21 CFR chapter 11 of US FDA-capable software
- ✓ Multi-user operation with multi-level security
- ✓ Door-wise local & timed anti-passback facility
- ✓ Maximum/minimum room occupancy rule support
- ✓ Employee-wise access limit to designated door

AI SOLUTIONS FOR INDUSTRY EXCELLENCE

Indian Infotech delivers innovative AI-powered solutions that drive efficiency, accuracy, and safety across various industries. From manufacturing to retail, our AI products streamline operations, ensure compliance, and optimize performance with real-time insights.

► KEY FEATURES

- ✓ **Computer Vision & Image Processing:** Real-time detection, classification, and tracking for improved quality control and operational efficiency
- ✓ **AI for Manufacturing:** Visual inspection systems that identify defects from millimeters to micrometers, boosting productivity and quality
- ✓ **Safety Compliance Solutions:** Automated monitoring for PPE compliance, fire and smoke detection, and safety zone control with instant alerts
- ✓ **AI-Powered Retail Analytics:** Customer behavior tracking, personalized advertising, and product inventory management using face recognition and object detection
- ✓ **Predictive Maintenance:** Analyze data to forecast equipment failures and prevent costly downtimes

► HOW IT WORKS ?

- 01 AI-Driven Insight:** Leverage our AI models to extract actionable insights from real-time data
- 02 Scalable Solutions:** Deploy across industries and customize to meet specific business needs
- 03 Real-Time Monitoring:** Ensure safety, improve production quality, and optimize workflows with continuous, intelligent analysis
