

CONTROL MODULE

IND MB01 Door Interlock Card

A compact 12V DC control module for coordinated multi-door access, electromagnetic locks, exit

CONTROL MODULE

INDIAN INFOTECH

SECURE ACCESS

Product Introduction

A compact 12V DC control module for coordinated multi-door access, electromagnetic locks, exit switches, and door sensing.

Core Functions

Flexible logic

Built-in NO and NC functions support configurable door behavior.

EM lock ready

Direct connection for 12V electromagnetic locks.

Exit switch

Dedicated port for easy unlocking from inside.

Door sensor

Integrated connection for a door sensor.

Key Features

◆ Product model: IND MB01

◆ Product code: MB01

◆ Input: 12V DC

◆ Output: 12V DC

◆ Product name: Door Interlock Card

◆ 12V EM lock: Direct connection for 12V electromagnetic locks.

Technical Specifications

MB01
Product code

12V DC
Input

12V DC
Output

IND MB01
Product model

Product Specifications

General & Physical

Product model IND MB01

Product code MB01

Input 12V DC

Output 12V DC

Product name Door Interlock Card

Access, Control & Electrical

12V EM lock Direct connection for 12V electromagnetic locks.

Exit switch Dedicated port for easy unlocking from inside.

Door sensor Integrated connection for a door sensor.

Voltage 12V operational voltage and 12V input power supply.

Application Scenarios

Secure office doors

Interlocked corridor

Industrial access

Controlled entry
