

REMOTE FINGER SENSOR

INDIAN F 12 / SLAVE

A rugged RS485 fingerprint sensor that captures and transfers biometric samples to an access-control panel. INDIAN F 12

Indian Infotech

Biometric Security

Product Data Sheet

Product Introduction

A rugged RS485 fingerprint sensor that captures and transfers biometric samples to an access-control panel. INDIAN F 12

Core Functions

Identity

Remote Finger Sensor

Access

A rugged RS485 fingerprint sensor that captures and transfers biometric sample

Integration

See the technical specifications for supported interfaces.

Deployment

Refer to the product manual for installation details.

Key Features

Communication

RS485 interface

Protection

IP65 rugged structure

Function

Capture and transfer samples

Integration

Biometric access controllers

Environment

Indoor and outdoor use

Technical Specifications

RS485 interface

Communication

IP65 rugged structure

Protection

Capture and transfer samples

Function

Biometric access controllers

Integration

Product & Identification		Hardware & Operation	
Communication	RS485 interface	Protection	IP65 rugged structure
Function	Capture and transfer samples	Integration	Biometric access controllers
Environment	Indoor and outdoor use		

Application Scenarios

Office Entrances

Commercial Facilities

Access Management

Security Installations

Application scenarios are illustrative labels; application photographs were not provided.
