Product Data Sheet

## Product Introduction

Advanced facial recognition with anti-spoofing, high-capacity templates and fast sub-0.3-second identification. AI-80 PRO

## Core Functions

### Identity

Ai Face Recognition

### Access

Advanced facial recognition with anti-spoofing, high-capacity templates and fa

### Integration

See the technical specifications for supported interfaces.

### Deployment

Refer to the product manual for installation details.

## Key Features

### Users

50,000

### Face Templates

50,000

### Rfid Cards

50,000

### Recognition

Less than 0.3 sec

### Display

8-inch IPS touch LCD

### Camera

2MP WDR low-light camera

## Technical Specifications

50,000

Users

50,000

Face Templates

50,000

Rfid Cards

Less than 0.3 sec

Recognition

| Product & Identification |                      | Hardware & Operation |                          |
|--------------------------|----------------------|----------------------|--------------------------|
| Users                    | 50,000               | Face Templates       | 50,000                   |
| Rfid Cards               | 50,000               | Recognition          | Less than 0.3 sec        |
| Display                  | 8-inch IPS touch LCD | Camera               | 2MP WDR low-light camera |
| Protection               | IP68 and IK04        | Memory               | 2GB RAM / 16GB Flash     |
| Dimensions               | 227 x 143 x 26 mm    | Power                | 12V DC                   |

## Application Scenarios

Office Entrances

Commercial Facilities

Access Management

Security Installations
