

Door Interlock Card

The IND MB01 Door Interlock Card is designed for secure and coordinated access in door interlock systems. Operating on a 12V DC input and output, the card provides built-in Normally Open (NO) and Normally Closed (NC) functions for flexible door-control operation. Dedicated connections for a 12V electromagnetic lock, exit switch, and door sensor make it suitable for controlled multi-door environments.

Specification	Details
Product Name	Door Interlock Card
Product Model	IND MB01
Product Code	MB01
Input	12V DC
Output	12V DC
Operational Voltage	12V
Application	Door interlock systems
Control Functions	Normally Open (NO) and Normally Closed (NC)
EM Lock Connection	Direct connection for a 12V electromagnetic lock
Exit Switch Connection	Dedicated connection for interior exit-switch unlocking
Door Sensor Connection	Integrated connection for a door sensor
Access Function	Secure, coordinated access across multiple-door environments
